Bachelor of Computer Applications Div-B Semester – III
Programming with Java

Continuous Lab Assessment – I

Day and Date – Friday, 11/08/2023

Time 45 Minutes

Max Marks – 15

SET - B

Q1. Write a program in Java which accepts an Array as an argument and returns another array consisting of all the prime numbers out of that array [5]

Q2. Write a program in Java to calculate the monthly electricity bill of a consumer according to the units consumed. The tariff is given below: [10]

Units Consumed	Charge
Upto 100 units	₹1.25 per unit
For next 100 units	₹1.50 per unit
More than 200 units	₹1.80 per unit

Unit consumed = Present reading - Previous reading

Use a function named calcElectricityBill(int unitsConsumed) and print the information in the main method as per the given format:

Consumer No. Name Units Consumed Amount

xxx xxx xxx xxx

Note: Take the inputs like Consumer No. Consumer Name, Previous Months Reading, Current Month Reading etc. from the user only.
